DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I: Figure 1

Group II: Figures 2 and 3

Group III: Figure 4 and 5

Group IV: Figures 6-8

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3679

The claims are deemed to correspond to the species listed above in the following manner:

Group I, claims 1-10, 12-14, 32-41, 53 and 54.

Group II, claims 1-15, 32-35, 37-41, 52 and 54.

Group III, claims 1-10, 12-14, 16-35 and 37-54.

Group IV, claims 1-10, 12-14, 33-41, 53 and 54.

The following claim(s) are generic: 1-10, 12-14, 33-35, 37-41, 53 and 54.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

According to PCT Chapter 10.03: "Lack of unity of invention...may only become apparent *"a posteriori,"* that is, after taking the prior art into consideration... If it can be established that A is known, there is lack of unity *a posteriori*, since A (be it a single feature or a group of features) is not a technical feature that defines a contribution over the prior art." An assessment of the prior art with respect to the independent claims provides no unity of invention since the "special technical features", i.e., "the shrinkage disc unit" common in each of the independent claims is known from patents GB 1,586,703 and US 4,979,842. This special technical feature(s), common to all species, do not define a contribution over the prior. See MPEP 1850.

A telephone call was made to Mr. Glenn Massina on 5/4/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSHUA T. KENNEDY whose telephone number is (571)272-8297. The examiner can normally be reached on M-F: 7am - 3:30 pm.
